

Minimum PC Requirements for BUI

- 🕒 Pentium IV or Athlon XP Pro
- 🕒 512 MB RAM
- 🕒 CD-ROM drive or access to network CD-ROM for installation
- 🕒 300 MB of free disk space or higher for installation and working space during processing
- 🕒 17" color monitor capable of 1024 x 768 SVGA display with 256 colors and 32MB of video RAM

Optional Hardware:

- 🕒 UPS Backup

Operating Systems Supported:

- 🕒 Windows 2000 Professional
- 🕒 Windows XP Professional

Required Software:

- 🕒 Microsoft Internet Explorer 7.x

****NOTE****

Microsoft Internet Explorer 6.x is supported. However, we have experienced some technical problems with it and cannot guarantee it will work 100% of the time. If you are running Internet Explorer 6.x, we recommend you upgrade to Internet Explorer 7 as soon as possible.

[Click here to download Internet Explorer 7 for Windows XP from Microsoft.com](http://Microsoft.com)

****NOTE****

As of this time, due to vendor limitations, Microsoft Internet Explorer 8.x is not supported

Minimum Internet Connectivity Requirements for BUI

- 🕒 DSL, Cable or equivalent broadband connection with connection speeds of at least 1.5Mbps down/250Kbps up for home-based users.

We recommend a business-class DSL or Cable connection of at least 2.0Mbps down/1.0Mbps up for office-based users.

****NOTE****

Dial-up and Satellite-based internet connections are not supported due to the speed limitations on those systems.
